

Monoon longifolium

Kingdom: Plantae

Clade: Angiosperms

Order: Magnoliales

Family: Annonaceae

Genus: *Monoon*

Species: *M. longifolium*

Monoon longifolium, commonly referred to as False Ashoka, Long-leaved Monoon, is a plant native to tropical Asia.

Height:

Monoon longifolium generally reaches a height of 2 to 4 meters.

Uses:

1. Medicinal Uses:

- Traditional Remedies: In traditional medicine practices, parts of *Monoon longifolium* are used for their potential health benefits. However, scientific research on its medicinal properties is limited.

2. Ornamental Uses:

- Garden Plant: The plant is often grown for its attractive, long, glossy leaves, making it a desirable addition to gardens and landscaping.

3. Ecological Benefits:

- Biodiversity Support: It plays a role in its native tropical habitats by providing cover and supporting local wildlife.

Religious Importance:

- Cultural Context: While *Monoon longifolium* does not have significant religious significance, its aesthetic qualities may be appreciated in various cultural and natural settings.

- Symbolism: Its lush foliage can represent health and vitality in certain traditional contexts.
