Cancer

A group of disorders in which certain cells lose control and undergoes uncontrolled division

HISTORY

The origin of the word cancer is credited to the Greek Physician Hippocrates (460-370 BC), Who is considered the “Father of Medicine”.

Hippocrates used the term carcinos and carcinoma to describe non-ulcer forming and ulcer - forming tumors.

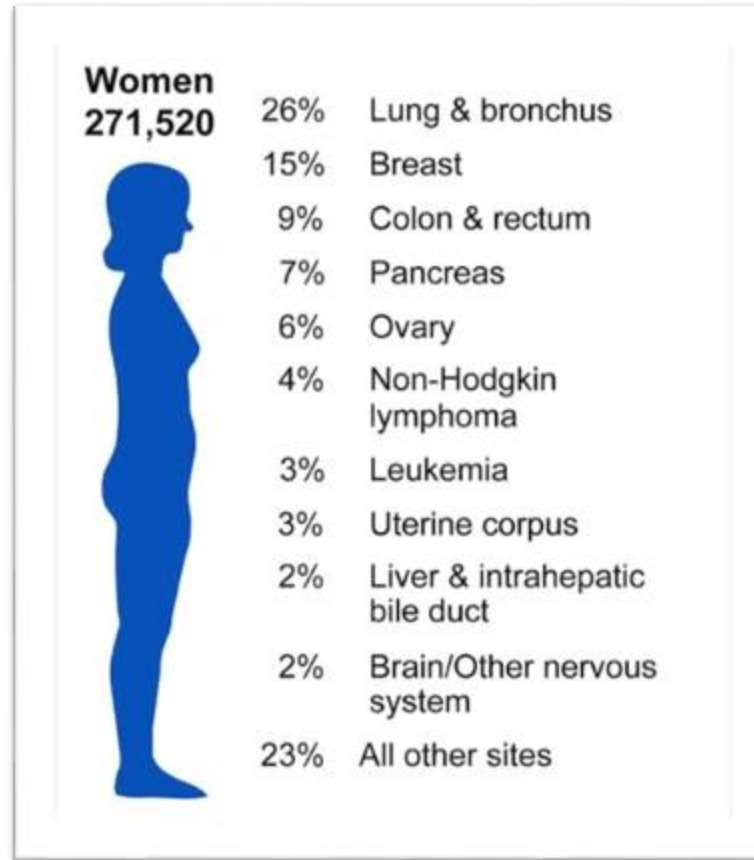

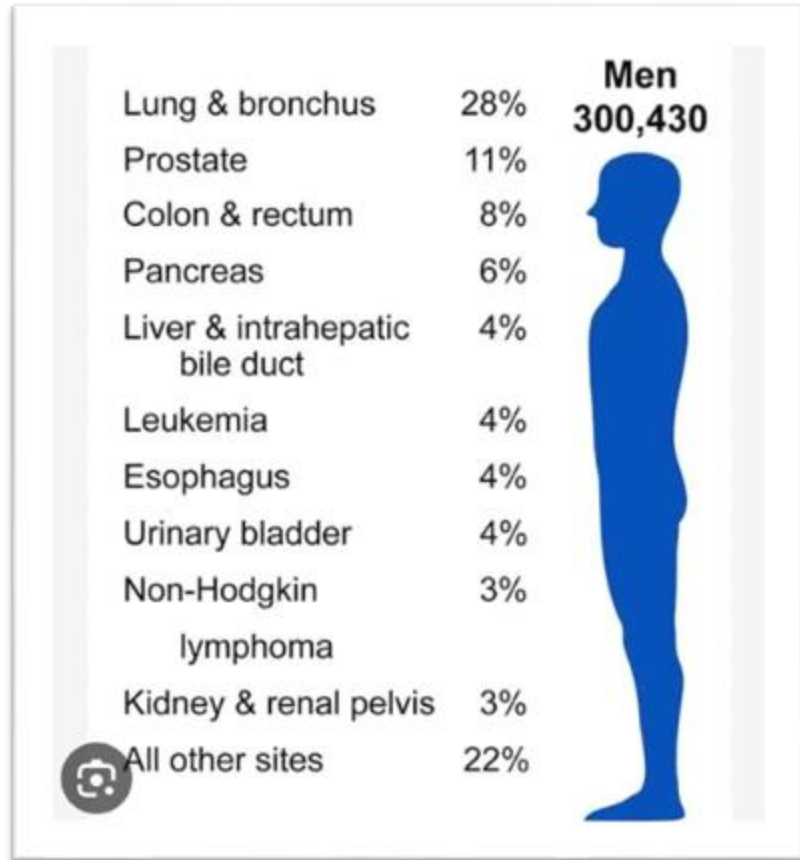

TYPES OF TUMOR

Nonmalignant tumor	Malignant tumor
<ul style="list-style-type: none">• Slowly growing mass	<ul style="list-style-type: none">• Rapidly growing mass
<ul style="list-style-type: none">• Regular surface, capsulated, not attached to deep structure	<ul style="list-style-type: none">• Irregular surfaces, non capsulated, attached to deep structures
<ul style="list-style-type: none">• No spread or metastasis	<ul style="list-style-type: none">• Spread and metastasis
<ul style="list-style-type: none">• No recurrence after surgery	<ul style="list-style-type: none">• Recurrence after surgery
<ul style="list-style-type: none">• No bleeding in cut surfaces	<ul style="list-style-type: none">• Bleeding from cut surfaces is common
<ul style="list-style-type: none">• Named by adding suffix -oma	<ul style="list-style-type: none">• Named by adding suffix -sarcoma or carcinoma
